SUMMARY

Full Stack Web Developer with a Certificate in Web Development | Coding from Georgia Tech with a creative background in service and the Arts. Strong problem-solving skills with a keen eye for aesthetics and presentation. An excellent communicator and collaborator who works well in team-based projects and independently with very strong interpersonal skills. With each project, the aim is to provide simple robust solutions to problems specified by the client. Enthusiastically looks for and discovers connections within complex systems while thriving to see opportunity in change and uncertainty.

PROJECTS

PetLife | Full-Stack Dev

<https://github.com/Mezran/GT-Project3-PetLife>: ||

<https://radiant-fjord-94176.herokuapp.com/>:

An app that keeps track of your pet's info regarding diet, medications, doctor visits (past and present), and petsitters. Helps keep track of upcoming doctor visits and schedules for when to give pets medication.

- **Role:** Helped design front-end in Adobe XD. Connected database to app with models and API calls.
- **Utilized:** HTML, CSS, JS, React, Express, Authenticated Login/Users with web tokens, Sass, Mongo/Mongoose, Axios, Bcrypt, React-router, Adobe XD, Cloudinary.

SuperMegaFanClub | Back-End Dev

https://github.com/maxwellmadewell/GTBC_Project_2: ||

<https://arcane-wildwood-00150.herokuapp.com/>

A go to app that gathers information for 4 different sports teams into one location. Choose your favorite team from Soccer, Football, Baseball, and Basketball.

- **Role:** Created data models that connected to SQL. Designed some pages on the front end. Implemented Slick into project. Established login functionality.
- **Utilized:** HTML, CSS, JS, JQuery, SportsFanDB API, SQL/Sequelize, Slick Carousels

React Memory Game | Sole Dev

<https://github.com/zigybass/React-Memory-Game> ||

<https://zigybass.github.io/React-Memory-Game/>

An app that allows users to read news pertinent to the United States while being informed about related events|charity organizations.

- **Role:** Core responsibilities entailed project management and quality assurance as well as working on the front-end of the application.
- **Utilized:** HTML, CSS, JS, React, Node/Express, Bootstrap

Travel Guide | Full Stack Developer

<https://github.com/zigybass/Travel-Guide> || <https://zigybass.github.io/Travel-Guide/>

This app is your international travel companion. You input the city and country you're visiting and the app brings up these associated tools for that country: translation, currency, local food, and weather.

- **Role:** Built out the currency API. Made API requests and setup routes to grab exchange rates. Used local/session storage to store data. Helped design front-end.
- **Utilized:** HTML, CS, JS, JQuery, OpenWeather API, CurrencyExchangeAPI, Zomato API, geolocation, Bootstrap, Slick

EXPERIENCE

A-Town A-List, Atlanta, GA

07/2015 - 04/2019

Logistics | Planning Manager

Successfully managed 8-person team while achieving objectives/goals and efficiently providing excellent customer service to each client.

- Effectively collaborated with the owner helping to reduce travel costs while maintaining group morale and safety standards.
- Successfully employed strong team-building and communication skills improving work culture and building moral.
- Diligently coordinated with new team members to efficiently train them on logistics allowing for a smooth transition and successful user and customer experience.
